### USING THE CASH FLOW REGISTER:

Consider the problem given in the following cash flow timeline:

This series represents uneven cash flows. To solve for the present value using the cash flow register, follow these steps:

- Press  **C ALL** This clears any numbers that might be in the CF register from previous work.
- Enter 0 and press  **CFj** If you hold down the CFj key, you will see CF 0 displayed, which indicates that you just input a value for CF<sub>0</sub>.
- Enter 50 and press  **CFj** If you hold down the CFj key, you will see CF 1 displayed, which indicates that you just input a value for CF<sub>1</sub>.
- Enter 100 and press  **CFj** If you hold down the CFj key, you will see CF 2 displayed, which indicates that you just input a value for CF<sub>2</sub>.
- Enter 500 and press  **CFj** If you hold down the CFj key, you will see CF 3 displayed, which indicates that you just input a value for CF<sub>3</sub>.
- Enter 250 and press  **CFj** If you hold down the CFj key, you will see CF 4 displayed, which indicates that you just input a value for CF<sub>4</sub>. At this point all of the cash flows have been entered.
- Enter 9 and press  **I/YR** This step enters the interest rate.
- Press  **NPV** 693.2376018 should be displayed—this is the PV of the cash flows that are shown in cash flow the timeline.
